

Wittnerchrome 200 D

The new high sensitive color reversal material with 200 ASA
(Agfa Aviphot Chrome 200)

- High sensitive 200 ASA / 24 DIN (5500K) daylight material, fine grain
 - Wide exposure range and natural colors
- Classical movie look with all the safety of the 16mm technique, magnificent for productions featuring a slight retro look
 - Pre-eminent for high speed applications
- Reasonably priced material for camera and movie practices

▪ 30,5 m / 100 ft	camera spool	perf. 2 R - 3000	EUR 49.50 netto / 58.91 brutto	
▪ 60 m / 200 ft	camera spool	perf. 2 R - 3000	EUR 84.- netto / 99.96 brutto	on request

Please note:

Polyester based material.

Splicing can only be done using splicing tape or ultrasonic splicer.

Possibilities for magnetic striping in preparation.

Operating your camera requires increased attention to avoid damages.

The material will be developed / processed to a sensitivity of 160/200 ASA by ANDEC.
Sensitivity of E6-standard development / processing could be slightly higher.
